INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/US03/40858**V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. STATEMENT**

Novelty (N)	Claims <u>1-58</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-58</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-58</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-58 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the combination of using an HFC diluent in combination with a reactor comprising a bayonet. The prior art has described bayonette heat exchangers (see Derwent 1992-022267 and Derwent 1998-330861 as cited on the International Search Report) and has also described the use of HFC diluents in polymerization methods (examples of Kruger et al (US '587)); however, given the vast array of possible reactor configurations and polymerization methods available in the art, no suggestion can be found to combine these two particular components into a single method.

Claims 1-58 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
